eggs was exposed to a secillo summerature, while auditor lot was subjected to one chilliness within one day (2-4 hours). The hatching capacity of the chilled lot was 1.3% higher than that of the other lot, and the chiefs were sturdier and mere telerant. Tests in other establishments corroborated the advantages of incubation

Vses. n.-i. in-ta ptitsevodstva, 1958, 25, 144-156 ABSTRACT : In the course of 4 years experiments were carried out pertaining to the raising of pullets in winter at low temperatures and applying darkening procedures periodically. It was proven that at 10-150 [C] pullets grow normally and develop well. Within the course of 4 months of raising, the pullets' live weight was 6.8 percent, the weight of their hearts 54.8 percent, their livers 46.4 percent, their lungs 22.8 percent, their gas metabolism 17.3-25.2 percent higher, their average egg produc-Card: \*Poultry Farming.

placed exactly one on top of the other. Using a method developed for these purposes, the authors obtain a system of equations for the calculation of the field harmonics in terms of coefficients that depend on the geometry and electric parameters of the plane-parallel grating. As a result of calculation, the values of the dispersions of the transmission coefficients  $|D_0|^2$  and the reflection coefficient  $|A_0|^2$  are calculated. The BESM-2 electronic computer is used to calculate and tabulate the values of  $|A_0|$  and  $|D_0|$  for three values of the parameter  $u = \cos T d/\ell = 0.0$ , 0.2, and 0.4, with k /2T = 0.2-3.2 and  $a/\ell = 0.25$ . The dielectric employed was foamed polystyrene

TOPIC TAGS: electromagnetic-wave diffraction, shielded metal array

ABSTRACT: The mathematical method suggested by Z. S. Agranovich, et al. (ZhTF, 32, 382, 1962) is used to solve the problem of diffraction of a planar electromagnetic wave normally incident upon a shielded dielectric-filled array. The flat-strip array is parallel to a perfectly-conducting plane, and the space between them is filled with an isotropic dielectric having an arbitrary permittivity. Arbitrary relations between the wavelength, array pitch and strip width are considered. The above structure is important in examining the double-mirror antenna arrays and also in investigating the propagation of

TITLE: Electromagnetic-wave diffraction at a flat metal array supported by a dielectric layer

SOURCE: Izvestiya vysshikh uchebnykh zavedeniy, radiofizika, v. 6, no. 2, 1963, 353-363

TOPIC TAGS: electromagnetic-wave diffraction, metal array

ABSTRACT: Metal-strip arrays for filters, polarizers, artificial dielectrics, etc., have been materialized either as rigid ribbons of a definite thickness or as thin coatings on a dielectric plate. Design formulae are usually based on an infinitely thin array in space. The article investigates mathematically the effect of an isotropic dielectric supporting plate on the diffraction characteristics of such an array. The diffraction field is found for arbitrary wavelength, strip width, dielectric thickness, and array pitch by the method developed by Z. S. Agranovich, et al. (ZhTF, 32,382, 1962). Approximate formulae for reflection and transmission coefficients are given, as well as the results of computations that used these formulae.

GEYVANDOV, L.N.; TRET'YAKOV, O.A.; SHESTOPALOV, V.P.

Diffraction of electromagnetic waves on multilayer plane metal grids (case of normal incidence and E-polarization). Radiotekn. i elektron. 8 no.8:1361-1373 Ag '63. (MIRA 16:8)

1. Khar'kovskiy gosudarstvennyy universitet im. A.M.Gor'kogo. (Electromagnetic waves—Diffraction)

TRET'YAKOV, O.A.; SHESTOPALOV, V.P.

Diffraction of electromagnetic waves on a pair of plane equiperiodic gratings different-sized gratings. Zhur. tekh. fiz. 33 no.10:1244-1251 0 '63. (MIRA 16:11)

1. Khar'kovskiy gosudarstvennyy universitet imeni A.M. Gor'kogo.

TRET'YAKOV, O.A.; SHESTOPALOV, V.P.

Diffraction of electromagnetic waves on a pair of plane metallic gratings. Zhur. tekh. fiz. 33 no.10:1232-1243 0 '63.

(MIRA 16:11)

1. Khar'kovskiy gosudarstvennyy universitet imeni A.M. Gor'kogo.

TRET'YAKOV, O.A.; SHESTOPALOV, V.P.

Controlling the radiation from a plane-parallel layer by means of gratings. Opt. 1 spektr. 15 no.5:709-712 N '63. (MIRA 16:12)
